CleanChoice Energy's Net Metering Program

The CleanChoice Energy Net Metering Program is free and available to CleanChoice Energy customers who own or operate an on-site eligible renewable electric generator that generates electricity for the customer's own use.

An eligible renewable electric generator includes those generators up to 2,000 kW in size that are powered by solar electric energy, wind, dedicated crops grown for electricity generation, agricultural residues, livestock manure, untreated and unadulterated wood waste, landscape trimmings, anaerobic digestion of livestock or food processing waste, fuel cells or microturbines powered by renewable fuels, or hydroelectric energy. Section 3 lists additional eligibility requirements.

When this form has been completed, please scan the completed form, and email it to support@cleanchoiceenergy.com. CleanChoice Energy will notify you if you have been authorized to participate in CleanChoice Energy's Net Metering Program. Please contact our Customer Care team at 1-888-444-9452 or support@cleanchoiceenergy.com if you have questions about your eligibility for this program or for guidance in completing this form.

Net Metering Application Form

Date: _____

Section 1. Net Metering Applicant's Contact Information

Name: _____

Mailing Address: _____

City: _____ State: _____ Zip Code: _____

Telephone Number: _____ E-Mail Address: _____

Section 2. Location of Net Metering Installation

1. Electric Account Number of Eligible Net Metering Facility site: _____

2. If address same as above check here:

If service address is different, please specify the address of the Eligible Net Metering Facility:

Service Address: _____

City: _____ State: _____ Zip Code: _____

Section 3. Description of the Eligible Net Metering Facility

1. Total Nameplate Capacity of the Eligible Net Metering Facility (kW): _____

For Photovoltaic systems: The nameplate capacity is the smaller of:

- a. The photovoltaic module wattage multiplied by the number of modules in the system, divided by 1,000 watts/kilowatt, or:
- b. The AC power rating of the inverter in watts, divided by 1,000 watts/kilowatt

For Wind turbine systems, reciprocating engines, Fuel cells: The rated power in watts divided by 1,000 watts/kilowatt

2. Type of Facility:

The Prime Mover is the type of system that will produce the electric power. The term “generator” is used to generically describe a system that produces electric power. *Select Prime Mover:*

- | | | | |
|--------------|--------------------------|----------------------|--------------------------|
| Photovoltaic | <input type="checkbox"/> | Reciprocating Engine | <input type="checkbox"/> |
| Turbine | <input type="checkbox"/> | Fuel Cell | <input type="checkbox"/> |

The Fuel Type is the energy source for the generator. *Select Fuel Type:*

- | | | | |
|--|--------------------------|--|--------------------------|
| Solar | <input type="checkbox"/> | Wind | <input type="checkbox"/> |
| Hydro | <input type="checkbox"/> | Landscape trimmings | <input type="checkbox"/> |
| Untreated & unadulterated wood waste | <input type="checkbox"/> | Dedicated Crops Grown for Electricity Generation | <input type="checkbox"/> |
| Anaerobic digestion of livestock waste | <input type="checkbox"/> | Anaerobic digestion of food processing waste | <input type="checkbox"/> |

Note: please complete a separate Net Metering Application Form for each facility type installed.

3. Other Information:

Please select an Annual Period. The Annual Period is a period of twelve (12) consecutive billing cycles that expire at the end of your April monthly billing cycle or your October monthly billing cycle. Select one:

- | | | | |
|-------------------|--------------------------|---------------------|--------------------------|
| April Bill Period | <input type="checkbox"/> | October Bill Period | <input type="checkbox"/> |
|-------------------|--------------------------|---------------------|--------------------------|

Section 4. Eligibility Requirements

- 1. If you already have a net meter installed:** If you are currently participating in your utility’s net metering program or another Alternative Retail Electric Supplier’s net metering program, then you are eligible for the CleanChoice Energy Net Metering Program. You will be removed from your current net metering program and placed onto CleanChoice Energy’s Net Metering Program following your completion and submission of this application. Your utility is required to notify CleanChoice of any currently enrolled net metering customers that are switching to CleanChoice Energy supply.
- 2. If you do not yet have a net meter installed:**
 - a.* You must have an Interconnection Agreement in place with your utility.
 - b.* You must have a meter installed by your utility that separately measures the in-flow and out-flow of electricity to and from your home. Your utility may charge for this meter, and such charges would be passed through to you on your electricity bill.

The steps above require that you work directly with your utility to ensure that your system is safely connected to the grid, and that your energy consumption and excess production are being accurately measured, accounted for, and sent to CleanChoice Energy with your monthly meter reads. The credit is exclusive of any monthly service charge, utility advanced meter surcharge, applicable taxes and fees or other charges. Only customers who meet the criteria can be eligible for this program.

Section 5. Terms of this Net Metering Application

This Net Metering Application must be completed in its entirety to be considered for CleanChoice Energy’s Net Metering Program.

Any changes or modification of the generating equipment, such as an addition of generating capacity to the Facility, addition of photovoltaic modules to the existing array, or replacement of generating equipment, requires the submission of a new Net Metering Application.

Net metering credits are issued for customers who produce excess energy on a quarterly basis following the below schedule. The utility sends CleanChoice the amount of excess electricity the customer generated in each billing period. CleanChoice

records the excess generation to credit outside of the bill, issued in the form of a check. The customer is credited at the same supply rate they would have been charged for each applicable billing period.

- Q1 – Credits issued for bills issued 1/1 – 3/31. Customer’s Q1 credit will be processed in April.
- Q2 – Credits issued for bills issued 4/1 – 6/30. Customer’s Q2 credit will be processed in July.
- Q3 – Credits issued for bills issued 7/1 – 9/30. Customer’s Q3 credit will be processed in October.
- Q4 – Credits issued for bills issued 10/1 – 12/31. Customer’s Q4 credit will be processed in January.

Any drop and re-enrollment in CleanChoice Energy service would also require the submission of a new Net Metering Application. The customer has 30 days to submit an executed application for interconnection to the utility. CleanChoice Energy may cancel authorization if the customer has not submitted within that time.
